The Hawaii Hydrogen Power Park: Hydrogen Technology Validation – Separating Fact from Fiction

The Hawaii Hydrogen Power Park is part of the technology validation program of the U.S. Department of Energy Hydrogen program. Its focus is the integration of complete hydrogen systems, including production, storage, dispensing, and end-use utilization, and testing them under real-world operating conditions. This presentation will report on progress and results to date, and provide a preview of our future plans.

James “Mitch” Ewan

Hydrogen Systems Program Manager
Hawaii Natural Energy Institute

Tuesday, December 5, 2006

3:15 – 4:15 PM

HIG Auditorium, Room 110
